Ontology User Story Template

1. Persona

Begin by creating a typical user profile for this ontology-based system. The user profile should include [name], [age], [occupation], [skills], and [interests].

2. Goal

Describe the [user goal], explaining what the user aims to accomplish using this ontology-based system. Then provide up to 5 relevant [keywords] that summarize the user goal.

3. Scenario

Outline the [current methods] the user uses and the related [challenges] they face when trying to achieve the user goal without an ontology-based system. Then illustrate how the ontology-based system can introduce [new methods] to help address these challenges. Finally, highlight the possible [outcomes] that may result from implementing this ontology-based system.
